

## Description

- Microbe-Powered, concentrated grout cleaner.
- Non-acidic formula ideal for general maintenance of commercial and industrial floors.
- Removes grease, oil, hard water stains, mildew and lime deposits.
- Restores badly-soiled grout to original color.
- Safe to use on grout, concrete and ceramic tile.
- Does not contain hazardous acids or chlorine bleach.
- Pleasant, clean fragrance.
- Bio-based, all-natural and biodegradable.

## Advantages Profile

An all too common problem in food service environments is the accumulation of oil, grease and food waste on floors and in grout. This accumulation build-up over time produces rancid odors and attracts pests such as fruit flies, roaches and other insects.

This build-up causes floors to be greasy and dangerously slippery. The use of standard cleaners, hot water or bleach does not remove this build-up of oil, grease and food waste nor do they deter pests which easily survive these treatments.

Brite Grout™ is ideal for daily cleaning of all ceramic tile surfaces and grout. Its unique streak-free formula penetrates fast and easily removes soils from grout without leaving a residue. This concentrated, pH-balanced tile and grout cleaner will easily remove soils with its penetrating action to remove dirt.

## Technical Information

Usage	Dilution Ratio	1:10
Physical Properties	Appearance	Liquid
	Color	Clear
	Fragrance	Citrus
	pH	6
	Shelf Life	Minimum 1 Year
Packaging	9901-004	(4) 1 gal./3.78

## Technology Profile

BioTec Technology is the science of using microbes and enzymes to dispose of fat, oil and grease ("FOG") and food waste safely, economically and rapidly. BioTec Technology consists of microbes and enzymes producing complex chemical reactions that metabolize organic waste into carbon dioxide and water. Enzymes work by breaking apart large complex compounds like FOG into smaller molecules.

The microbes then can readily digest these smaller molecules releasing them as carbon dioxide and water. The microbes and enzymes are completely safe because they are non-pathogenic, naturally-occurring and salmonella-free. These microbes are chosen for their ability to degrade FOG as well as starches and proteins.

## Application

### Light-duty cleaning:

Dilute 1 ounce of Brite Grout™ with 1 gallon of water. May be applied with auto floor scrubbers, mops, foam guns and pressure-sprayers.

### Medium-duty cleaning:

Dilute 10 ounces of Brite Grout™ with 1 gallon of water. May be applied with auto floor scrubbers, mops, foam guns and pressure-sprayers.

### Heavy-duty cleaning:

Dilute 24 ounces of Brite Grout™ with 1 gallon of water. May be applied with auto floor scrubbers, mops, foam guns and pressure-sprayers.
